

Divi: The Multipurpose theme

Divi is a theme of WordPress used for building up websites by Elegant themes. Since Divi has been making it to the list of all my top lists I decided to write one just dedicated for Divi. Divi is multipurpose theme since it offers many different layouts for business sites, online stores, portfolios and many more. Not only a multipurpose theme but the ultimate WordPress theme and a visual page builder.

Divi has gone through many updates and trust me every time it is getting better and simpler. Here, I must appreciate the creators who have not just created it but have been updating it constantly as well making it more powerful and convenient.

Key Features of Divi

Powered by Divi Builder

Real time design

Everything is easily customizable

Organize with ease

46 content elements

Insanely fast

20+ pre made layouts

Import and export layouts

Sync global elements across multiple pages

Selective and responsive editing

Two actions: Click and type (no need to open the settings panel each time)
