```

Firstly, WordPress is the most popular and powerful content management system nowadays and has been for many years.

What is WordPress?

WordPress is a CMS (content management system) that you can easily create your own website in a few minutes.

Nowadays, WordPress has become one of the most popular CMS. WordPress's journey started in 2003 and today it's managed to handle more than 70 million websites in the world.

In the beginning, WordPress started as a platform for bloggers only to create their blog posts.

As of 2020, the blogger based WordPress has become a full package of CMS that nearly half of the world is using to create desired websites.

The main thing is that there are tons of Plugins, Themes, and Widgets that enable you thousands of tools to create your desired website.

Reasons to Choose WordPress as CMS!

- WordPress is free of cost
- WordPress is SEO friendly
- We can create any kinds of websites with WordPress
- WordPress is super easy to customize
- It is beginner-friendly
- WordPress is secure

WordPress Maintainence and Support Services:

Keeping a WordPress website updated, secured, and maintained is important and also tough for those who are new to WordPress, non-technical people.

That's why WordPress maintenance is necessary.

What does WordPress Maintenance and Support Service Include?

1. WordPress Site Support:

Many web maintenance companies provide different support plans including website maintenance, website security with web optimization support.

2. WordPress Security:

WordPress Security protects your site from hacking, spam, and other threats. It keeps your site safe when you are also offline.

3. Speed Optimization:

This will optimize your website by analyzing and optimizing the image you have used on it. It analyses that images should be small in size with the best quality.

Websites with high graphics or images suffered from load times even though you have maintained them well.

4. Regular WordPress Updates:

Regular update of WordPress, WordPress Themes, WordPress plugins are the main part of the WordPress maintenance.

The screenshot shows the WordPress Updates interface. At the top, it says "WordPress Updates" and includes an important notice: "Important: before updating, please [back up your database and files](#). For help with updates, visit the [Updating WordPress](#) Codex page." Below this, it indicates the last check was on February 22, 2019, at 6:52 am, with a "Check Again" button. A notification states: "An updated version of WordPress is available. You can update to [WordPress 5.1](#) automatically." There is a prominent "Update Now" button. A note below says: "While your site is being updated, it will be in maintenance mode. As soon as your updates are complete, your site will return to normal." Under the "Plugins" section, it says: "The following plugins have new versions available. Check the ones you want to update and then click 'Update Plugins'." There is an "Update Plugins" button. Below that, there are two "Select All" checkboxes. The first plugin listed is Gutenberg, with a checkbox, its logo, and the text: "Gutenberg You have version 5.0.0 installed. Update to 5.1.1. [View version 5.1.1 details](#). Compatibility with WordPress 5.0.3: 100% (according to its author) Compatibility with WordPress 5.1: Unknown". A second "Select All" checkbox is at the bottom.

The regular update makes changes in:

Cool New Exclusive Features:

By updating your old WordPress version you can get new

features that can make you easy to work.

For Security:

It helps to secure your website from hacking and spam.

Bug Fixes:

It helps to fix bugs of your site. Updating an old version of WordPress also can protect your site from bugs.

Compatibility:

It brings more compatibility to your WordPress Website.

Conclusion

Making sure your WordPress websites are updated regularly, strong security is the most important part of the WordPress website.

Our WordPress maintenance and support companies are providing those all support.
